

THE KITCHEN EQUIPMENT COMPANY LIMITED**Quality Policy**

The quality management system is continually monitored and evaluated for its applicability and effectiveness and to establish quality objectives and opportunities for continual improvement through management review.

Minimising the Impact on the Supply Chain

Kitchequip endeavour were possible to have options on the products that they purchase on behalf of our customers. This enables the company to source the same product, and therefore reduce the downtime / delivery time to their customers.

It is the company policy to ensure that all employees are aware of their responsibilities within the Quality Management System.

Annual Review

Annual review will take place between the Directors and sales team, to assess which supplier has performed to a satisfactory standard. Any suppliers that we feel are not providing a quality service or product will be advised to improve the quality or we will remove them from our database of approved suppliers

Darren Hall
Director
